## TABLE OF CONTENTS

ACRONYMS .....	iv
ACKNOWLEDGMENTS .....	v
CHAPTER 1	
INTRODUCTION .....	1
CHAPTER 2	
THE EPIDEMIOLOGY OF FMD .....	7
CHAPTER 3	
CONTROL AND ERADICATION OF FMD .....	13
CHAPTER 4	
ROLE OF THE LIVESTOCK INDUSTRY .....	21
CHAPTER 5	
TRADE ISSUES .....	33
CHAPTER 6	
THE ACTION PLAN AND RELATED ISSUES .....	39
CHAPTER 7	
MODELING A FMD OUTBREAK IN TULARE COUNTY .....	51
CHAPTER 8	
ESTIMATION OF THE OUTBREAK COST .....	59
CHAPTER 9	
SUMMARY AND RECOMMENDATIONS .....	67
REFERENCES .....	73
APPENDIX	
A: CALIFORNIA'S LIVESTOCK INDUSTRIES .....	81
B: KEY PARAMETERS OF THE EPIDEMIOLOGICAL MODEL .....	93
C: KEY PARAMETERS OF THE ECONOMIC MODEL .....	99
D: LIST OF CONTACTS .....	107
E: RECENT FMD OUTBREAKS IN TAIWAN AND ITALY .....	109
F: LITERATURE REVIEW .....	113

## ACRONYMS

AI	Artificial insemination
APHIS	Animal and Plant Health Inspection Service (USDA)
CASS	California Agricultural Statistical Service
CCA	California Cattlemen Association
C C C	Commodity Credit Corporation
CDFA	California Department of Food and Agriculture
C&D	Cleaning and disinfection
DHIA	Dairy Herd Improvement Association
EU	European Union
FAS	Foreign Agricultural Service (USDA)
FADDL	Foreign Animal Disease Diagnostic Laboratory
FEMA	Federal Emergency Management Agency
FMD	Foot and Mouth Disease
GATT	General Agreement on Trade and Tariffs
NASS	National Agricultural Statistics Service - (USDA)
OIE	International Office of Epizootics
UHT	Ultra high temperature
UR	Uruguay Round of GATT
USDA	United States Department of Agriculture
WRL	World Reference Laboratory
WTO	World Trade Organization

## ACKNOWLEDGMENTS

This book would not have been completed without the support of numerous colleagues and friends, at UC Davis as well as Animal Health Branch (CDFA) and the California office of Veterinary Services (APHIS). My understanding of animal health emergencies, of regulatory issues, and of the California livestock and dairy industries came from my interaction with professionals at these institutions. I also gained enormously from having access to their databases and archives.

David Hird was instrumental at all stages of the project, from securing the financing to introducing me to animal health issues and discussing the draft manuscript. Ken Thomazin (CDFA) and Bill Utterback (APHIS) helped to procure the financial resources, provided the invaluable support of their agencies, and their profound knowledge of animal health emergencies.

Bill Heron, Dave Kerr, Phil LaRussa, Dana Nelson, Chuck Palmer, Victor Velez, David Willoughby and Dennis Wilson provided invaluable insights on different issues through the whole project. Dennis Wilson also introduced me to the dairy and livestock industries in California's South Valley, while Phil LaRussa and Dana Nelson collaborated in the estimation of the direct cost of dealing with an outbreak of an exotic animal disease and provided support with GIS. Tim Carpenter reviewed the epidemiological model, and Moshe Rosenberg helped me to understand the technical details of milk processing.

Lovell Jarvis and Daniel Sumner discussed several economic issues, and made very helpful comments on early drafts of this book. Daniel Sumner also provided the invaluable support of the UC Agricultural Issues Center for publishing this report. Ray Coppock did an excellent editorial job.

While I cannot mention the names of everyone who helped through this research, I would like to say that this book would not have been possible without their support.

The research reported here was conducted while I was a post-doctoral fellow at UC Davis in the Department of Agricultural and Resource Economics and the Department of Medicine and Epizootiology, School of Veterinary Medicine.
