	Rank	\$m
Tablegrapes	1	13
Dairy	2	9
Cotton	3	5
Wine	4	3
Tomatoes Processed	5	2
Others		8
Total		40

This table provides the approximate exports to each of the top destinations for the 32 California commodities with the largest total export values in 2002, and 10 additional commodities for which California accounts for over 85% of U.S. exports, or for which reliable export data was available. For each of the 8 commodities that are not included here, California accounts for less than 25% of U.S. exports, making it difficult to estimate export destinations with available data sources.
