* This table provides the approximate exports to each of the top destinations for the 33 California commodities with the largest total export values in 1999, and 8 additional commodities for which California accounts for over 85% of U.S. exports, or for which reliable export data was available. For each of the 9 commodities that are not included here, California accounts for less than 25% of U.S. exports, making it difficult to estimate export destinations with available data sources.
