The Measure of California Agriculture, 2000

AUTHORS
Nicolai V. Kuminoff and Daniel A. Sumner with George Goldman

PUBLISHER
University of California Agricultural Issues Center, November 2000
114 Pages
$15.00 (includes shipping & tax)

A revised, updated and expanded edition of the Agricultural Issue Center’s most popular publication is now available.

The Measure of California Agriculture, 2000 (MOCA 2000), documents California agriculture and its relationships to the rest of the economy. MOCA 2000 provides an overview of unifying forces and trends and a convenient compilation of facts and figures from a variety of sources, along with useful interpretation.

Chapter headings include California’s farms and farmers; inputs to farm production; demand and supply trends; marketing, trade, policy, risk management; and agriculture’s impact on the economy as a whole.

Topics entirely new to the 2000 edition include farmland urbanization, farmer demographics, chemicals and fertilizer, water, technology, research and development, cooperatives, grower-processor contracting, exotic pests and diseases, and risk management.

The Measure of California Agriculture, 2000 can be ordered in hard copy or viewed and downloaded in its entirety or by chapter from its AIC web page (http://aic.ucdavis.edu/pubs/moca.html). During the interim between paper editions, AIC will provide electronic updates as new data become available. To stay informed about new electronic updates, periodically check the MOCA web page.

Summary Card Sets with key facts and figures are also available from the Center in a “pocket-size” folder.
