<sup>1</sup> Export quantities of processed goods were converted to farm fresh quantities using conversion factors published by USDA ERS (<http://www.ers.usda.gov/publications/ah697/>) or annual conversion factors published by USDA NASS in annual crop summaries.

<sup>2</sup> Quantities for 2012 were revised based on updated production data from the U.S. Department of Agriculture/National Agricultural Statistics Service.

<sup>3</sup> 2012 Dairy export quantities were revised based on improvements in estimation methodology.

<sup>4</sup> Farm quantity exported for dairy and products is calculated by converting cheese, condensed milk, fluid milk, ice cream, nonfat dry milk, and whole dry milk to their fluid milk equivalents.

<sup>5</sup> Grapes, all includes grape juice, raisins, table grapes, and wine.

<sup>6</sup> Product category olives and olive oil is equal to the product category olives and products found in previous years' data tables.

<sup>7</sup> Raspberries and blackberries category also includes exports of mulberries and loganberries.

<sup>8</sup> The weighted average is based on each of the 53 commodity's share of production value. Values for chickens, flowers and nursery products, mushrooms and seeds for sowing are not included because reliable data on export quantity is not available.
